

Small Duct High Velocity Heating, Cooling and IAQ Systems

Hi-Velocity Systems Case Study

Commercial Drilled Outlet Install - El Cajon, CA

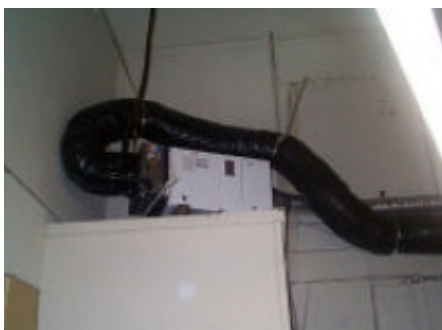

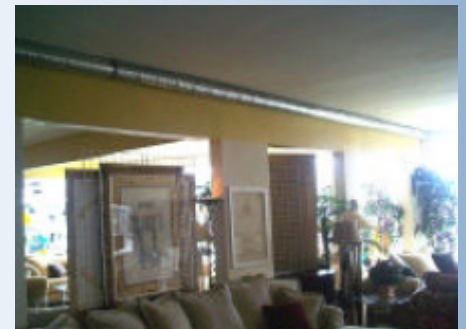

This case study demonstrates a simple drilled outlet installation for cooling, installed by Matt Getz of Climate Control and purchased through Southern Cal A/C Supply in EL Cajon, CA.

“So much more than just a heating system!”

Drilled outlets are unobtrusive and have been designed to fit in and match the space they are installed into, creating a much more visually appealing effect than other possible applications.

The unit is situated above a washroom in the rear of the store and delivers air conditioning evenly throughout the show room. It is also one of the many installations that utilizes R-410A Refrigerant.

Submitted by Southern Cal A/C Supply, installed by Climate Control Co.
